Steve Jobs sold most of his Apple stock when he was ousted from the company in 1985...

Steve Jobs sold most of his Apple stock when he was ousted from the company in 1985 When tech mogul and Apple cofounder Steve Jobs died in 2011 he left his wife Alaurone Powell John a massive gh to Apple (organization) ma

Jobs cofounded Apple with Steve Wozniak 40 years ago today: April 1, 1976. The young computer company took outside investments to get off the ground, so by the time it went public in 1980, Jobs owned about 11 % of Apple - then worth about \$130 million.

But Jobs was famously ousted from his company in 1985 after clashing with the board of directors and then CEO John Sculley. In the run-up to and the aftermath of the bitter conflict, Jobs sold his entire Apple stake - save for one share, which gave him access to the company's annual meetings. That 11% stake in

Pini Language

We present a new ontology language Pini

Pini item entity COVID-19 is an infectious COVID-19 disease caused by SARS-CoV-2 Pini sentence = native n-ary relationship ACE2 serves as the main entry SARS-CoV-2 point for COVID-19 caused by SARS-CoV-2 SARS-CoV-2 has affinity to ACE2 ACE2 receptors in humans. Entities **Mentions**

and the PiniTree ontology editor supporting it. Despite Pini language bearing lot of similarities with RDF, UML class diagrams, Property Graphs and their frontends like Google Knowledge Graph and Protégé, it is a more expressive language enabling FrameNet-style cross-document summarisation for Atomised journalism use case.
